Jesse Lewis

Full Stack Javascript Software Engineer and Digitizer of Dreams

{ (512) 573-1601 || jesseaustinlewis@gmail.com || github.com/Lazercat || thejesselewis.com }

SKILLS

Technical
JavaScript ES6-ES8, React.js, Node.js, Material UI, Semantic UI, Git/Git Server, Microservices, Express, Mocha/Chai, Docker, HTML, CSS/SASS, JSS, Mac OS, XML/JSON, SQL, MySQL, MongoDB, Linux

Practical/Soft
Agile / Scrum Team Member, Project Management Certification - PSU 2012 G.E. Change Acceleration Process (CAP), Public Speaking, Meeting Facilitation, Presentations, Conflict Management, Friendly, Creative, Innovative

EXPERIENCE

Node.js Developer Modis | July 18 - Present, Metro Washington, D.C.
Currently enjoying work on a client contract in a close-knit engineering team that engages my Node.js database and functional programming skills to leverage PM2, Node.js, Express and MySQL into a complex microservices implementation on Linux/Ubuntu Server. Duties include design, architect, prototyping, testing, deploying and maintaining microservices, dev, staging and production environments.

Software Engineer OneGlobe LLC | May 18 – June 18, Metro Washington, D.C.
Working as a full time React.js software engineer on a government contracted Agile/Scrum team alongside UX Designers. I am building a custom Semantic UI theme and reusable component library in React and documented/showcased inside of a customized Storybook UI implementation that supports the rapid development efforts of our entire engineering team.

Software Developer Aunt Bertha, Inc |Jan 18 - May 18, Austin, TX
An engaging and efficient member of the software engineering team. Provided advanced knowledge of the React.js library to extend our company programs and customer outreach. Leveraged cutting edge UI skills in React with Material UI on a Python stack in Google App Engine. Helped build a web application that manages customers and their settings and performed rapid development to achieve a major UI upgrade in React for a core web site feature that links people in need to a variety of social services programs nationwide.

Web Specialist 2 Oregon Health & Science University | July 09 - May 17, Portland, OR
Built custom web solutions with Javascript, HTML/CSS, JQuery and PHP for a variety of business needs for 11 core services departments. As a lead SharePoint developer, I implemented business critical solutions and site collections with InfoPath and Nintex Forms and Workflows, including a department's risk management system which now assures OHSU's hospital accreditation and compliance with federal and state governing agencies. Lead developer and designer of websites for the City of Portland Tram, ohsu.edu with and the OHSU intranet CMS for 11 of our departments.

EDUCATION

Web Development Immersive
General Assembly (Austin, TX)
Sept 2017 - Dec 2017
3-month fulltime boot camp focused on web development best practices. Made several web apps including ArtShare: a distributed MERN stack app allowing Facebook users to photo share art online.

Associate of Arts Degree
Portland Community College
Summer 2011 - Winter 2016 (part-time)
Earned associates with an emphasis on Computer Information Systems, JavaScript and various programming languages as focused curriculum while working full-time days at OHSU in Portland, OR
